

# SYMPTOMS & EXPOSURE FLOW CHART

## Students

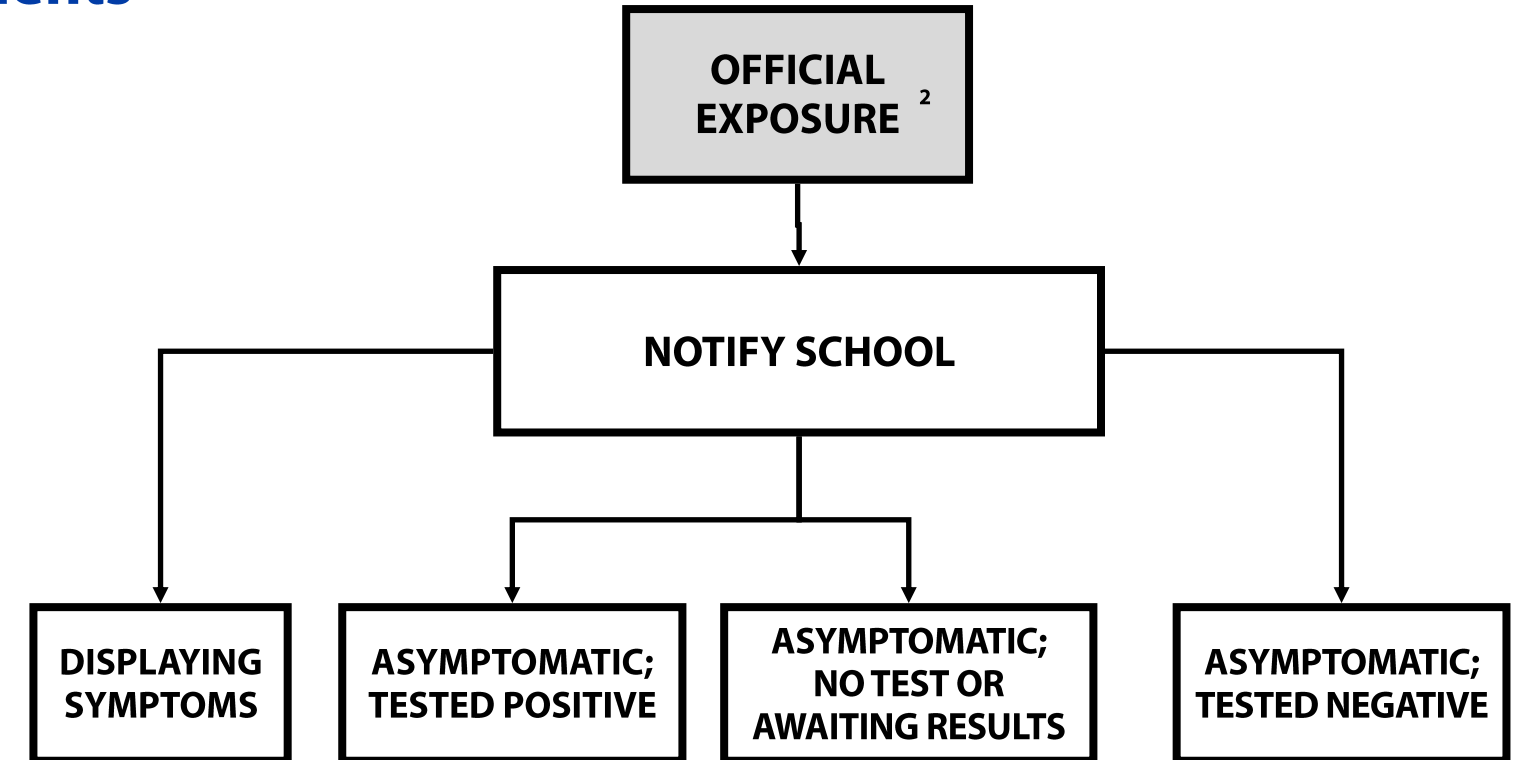

• Per CDC Guidelines, students must quarantine until (all three):

1. They have gone 72 hours with no fever,
2. Their respiratory symptoms have improved,
3. **And it's been 10 days since first symptoms.** Your healthcare provider may also recommend additional testing.

• Per the standard VCS student sick policy, student may return after 48 consecutive hours without symptoms.

• If a student is awaiting test results, OR has chosen not to be tested, symptomatic students must proceed as if they have tested positive (see "Tested Positive" re: quarantine and return steps).

<sup>1</sup> **COVID-19 symptoms** include: fever or chills, persistent cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose (with additional symptoms), nausea, vomiting, or diarrhea.

• Follow "Displaying Symptoms" flow chart.

• Follow "Tested Positive" flow chart under "Displaying symptoms," even though student is asymptomatic.

• Although the Arizona Department of Health does not recommend any isolation for asymptomatic persons who have not been tested or are awaiting test results, out of an abundance of caution, VCS recommends (but does not require) that students self-quarantine for 72 hours from date of last official exposure.

• Although the Arizona Department of Health does not recommend any isolation for asymptomatic persons who are awaiting test results, out of an abundance of caution, VCS recommends (but does not require) that students self-quarantine for 48 hours from date of last official exposure.

<sup>2</sup> For the chart above, **Official Exposure** is defined as spending 15 minutes or more within 6 feet of someone who has tested positive for COVID-19, whether or not a mask was worn.
